

Whelping Box Assembly Instructions

Equipment/tools required: Phillips screwdriver, cellotape

1, Once your box arrives, remove contents from outer packaging. The whelping box comprises of (A) The whelping box as pictured left, (B) 3x Wooden puppy Rails with screws and washes taped to one end, (C) Paragon coated liner board.

2, Pull the edges of the box outwards to make a square shape box as per the picture on the right. The box is currently in the upside down position. Now you need to start folding the base flaps into the centre of the box starting with the large ones first, followed by the 4 smaller flaps.

3, You should now end up with the box looking the same as the picture below! You will now require your cellotape to stick the base flaps firm. Brown 75mm parcel tape is very good for this.

4, Turn the whelping box the correct way up. Fold the front flap inside.

(We recommend that you place a layer of newspaper beneath and on top of the liner to extend its lifespan or alternatively use Petnap Absorbent Whelping Pads – available at www.petnap.co.uk).

5, Place paragon coated liner, shiny side up, in the base of the box as pictured left.

6, If purchased, place fleece lining* in base of box.

***Machine washable: gentle wash 40°.
Do not tumble dry. Wash before use**

7, If using, position the puppy rails in the box at the desired height (a guide has been printed on the box, though you may need to position the rails higher/lower to suit your breed of dog – a good guide is to position the rails at the height of the bitches spine when she is lying on her side).

8, Using the screws, pierce a hole at the desired position, then using a washer on the outside of the whelping box screw through into the puppy rail – tighten very firmly to clamp the rails through the cardboard to the washer.

Place the 2 side rails in BEFORE the rear rail. Fixings are only supplied with rails. *HAPPY WHELPING!*

The use of this item is entirely down to the purchaser's own risk, Petnap Limited and its preferred resellers will not be held responsible for any damage or harm caused in anyway by any part of this item. If you are not happy with your purchase returns will be accepts if the item is unused.
